

POSITIONS at BTI

Postdoctoral Research Fellows / Research Officers (Ref: WB/PDRO/010808)

In the last 2 years, five major biopharmaceutical companies have announced that they will be manufacturing biopharmaceutical drugs in Singapore. As this biologics industry grows, BTI is recruiting more staff to be trained for this sunrise industry in diverse areas of research. There will be opportunities to develop deep practical skills within these disciplines, work in cross-collaborative programmes and train interns for the industry. Successful candidates will be involved in collaborative projects with industry and could also participate in new research programmes in the following areas of biotherapeutic production and cell therapy:

- Expression Engineering
- Animal Cells
- Microbial Cells
- Stem Cells
- Downstream Processing & Analytics
- Microarray & Proteomics
- Immunology: Antibody, Adjuvant and Vaccine Development
- Good Manufacturing Practice for biologics and cell therapy

Requirements:

- A PhD/Master's/Bachelor's Degree in Biological/Chemical Sciences or Biochemical/Chemical Engineering.
- Relevant experience in any of the above areas will be an advantage.

An attractive remuneration package commensurate with qualifications will be offered. To apply please write in or email resume with copies of educational transcripts/certificates and names and addresses of three referees to:

The Executive Director
Bioprocessing Technology Institute
